The 10th Hong Kong Logistics Forum cum Business Matching Luncheon

This is an extraordinary year for the launch of 5G mobile service amid the Covid-19 pandemic. I am thankful to all the speakers illustrating "5G Application in Logistics SME" from the Office of the Communications Authority, Logistics and Supply Chain MultiTech R&D Centre, Alibaba Cloud Intelligence Hong Kong and Million Tech Development Limited. The characteristics of 5G were precisely explained – High Speed, Low Latency, and Massive Connectivity. Practical applications have been introduced such as the Smart Warehouse, Smart Delivery and various cloud computing applications. This forum enlightened me that there is an unimaginable potential for traditional industries evolving towards new era.

Mr. Vince Leung - HKLA Chairman, E-Logistics Committee

Mr. Sanda Cheuk - Deputy
Director - General, Office of the
Communications Authority

Mr. Simon Wong - Chief
Executive Officer, Logistics and
Supply Chain MultiTech R&D
Centre

Mr. King Chan - Associate
Director, Alibaba Cloud
Intelligence Hong Kong

Mr. Eric Lai - Project Manager,
Million Tech Development
Limited

The 10th Hong Kong Logistics Forum cum Business Matching Luncheon was successfully held on 29 September 2020. In the forum, members and guests shared opinions about 5G applications in Logistics such as cloud computing, smart tracking systems, and automatic labeling machines, all of which will be constructive in dealing with the growth of E-commerce business. As 5G applications are enablers in the logistics industry, all of us should know appropriate ways of using it, in order to improve operational efficiencies in the warehouse, develop better customer relationships and provide a convenient service in last-mile delivery.

Mr. Steven Chan - YSHKLA Internal Vice Chairman

It was my first time to join a large-scale O2O (online via zoom and offline) forum. As a member of supporting team, it is quite a big challenge for me to arrange such a large event in this pandemic situation. We have successfully maintained a smooth operation via Zoom by quick response to any technical difficulties during the virtual forum on air.

I would like to thank all the participants and our members, as this event would not be a successful one without your supports. I think HKLA is one of the pioneers hosting O2O forum in Hong Kong. Looking forward to more fruitful events of HKLA in future.

Mr. Ken Tang - YDC Chairman

SMART LOGISTICS Series II - Strategic Technology Trends of the Logistics Industry Webinar on 27 August 2020

The association successfully conducted a co-webinar with Ricoh Hong Kong Limited on 27 August 2020. The main themes were “Top 10 Strategic Technology Trends in the Future” and “Automation and AI revolutionizing the logistics industry”. It is informative for the logistics industry to face the challenges of the digital world.

SMART LOGISTICS Series III - Technology in Logistics Webinar on 8 September 2020

SICK Optic-Electronic was honoured to give a talk via the webinar called “3D Vision Technologies for Logistics Applications” which was jointly organized by HKLA and the Hong Kong Productivity Council on 8 Sep 2020. The Deputy Area Sales Manager of SICK, Mr. Thomas Mak shared the latest technologies of 3D camera, the pros and cons of 2D and 3D cameras as well as the typical 3D camera applications in the logistics industry. Thomas also showed an auto dimension-measuring demo which uses the SICK Visionary-S (structure light) 3D camera to measure the volume of a carton box automatically and instantly. The webinar was attended by more than 20 industrialists in the field.

International Conference on Logistics 4.0 Transformation of Hong Kong SMEs for Logistics, Manufacturing and Trading

The International Conference on Logistics 4.0 was drawn to a successful close in late September, along with introduction of Logistics 4.0 maturity level model for Hong Kong co-initiated by Fraunhofer IPT and HKPC. This conference gave the audience more insights on the innovations and advantages in the Logistics 4.0.

Group photo of Hon Frankie YICK, Legislative Councillor, Mr Willy Lin, Chairman of Hong Kong Shippers' Council and Hong Kong Productivity Council, two local speakers and representatives of collaborating organisations

Mr Toni Drescher from Fraunhofer IPT Germany shared on Logistics 4.0 and current challenges in supply chain and introduced the Logistics 4.0 maturity level model

Mr Justin BAIRD from DHL Singapore delivered a speech on customer-centric supply chains in the experience economy and introduced on the DHL Trend Radar

Ms Anne Thiesen from Port of Hamburg Marketing for Hong Kong & South China shared on the latest global trends in logistics industry and the concept of smart port

Dr Ing Anke Wierorrek from Fraunhofer IML briefed us about the current developments and future trends in logistics and supply chain management

Ir Kelvin Ko from BPS Logistics Technology shared with us about the application of Logistics 4.0 to react the dynamic situation and customer needs
